

# *Single Masted Nautical Aluminum Flagpole*

***The Single Masted Nautical flagpole is distinctive by its appearance and exciting by its display of many flags. Very appropriate for locations such as yacht clubs, marinas, bank buildings with marine names, sea food restaurants, lake attractions, resorts, boat and fishing enterprises and many more.***

***Flags flying from the main mast and from the yardarms give a “full sail” attraction where restrictive sign ordinances limit efforts to be noticed. Flying flags are exciting, they signify activity-there’s no need for “open” signs here!***

***The Single Mast Nautical flagpole is an inexpensive way to show your colors with a nautical theme. Designed to meet architectural standards for strength and finish, they are uniformly tapered to approximately 1” in every 5’6”. The highly polished deep luster finish is maintenance free. The accessories are all made of aluminum and other maintenance free materials.***
